Subject: Beach Renourishment Project - Palm Beach Florida - DON'T DESTROY
THE REEF!!!!!!

Sir:

As a diver in the Palm Beach County area, I am urgently requesting that the above project be reconsidered. Taking sand from the barrow area only 400 feet from the Horseshoe reef area would seriously damage the reef. There are other areas that are more suitable for this purpose and would not harm one of our area's most beautiful natural resources which can never be replaced or "refurbished" as is the case with the eroded coast line. We should not sacrifice one natural resource, to save another. Please consider other possibilities for the barrow area i.e. Palm Beach Inlet or Peanut Island...it is more suitable sand for the beaches and serves the double purpose of deepening those areas by the removal of unwanted build up in the inlet and near the island AND renourishing the beaches...a win win rather than a win lose.

Thank you for your consideration.

John W. Zimms
